Directors' report

For the year ended 31 December 2020

The Directors present their report on the affairs of Azura Power West Africa Limited, together with the financial statements and auditor's report for the year ended 31 December 2020.

Principal Activity and Business Review

Azura Power West Africa Limited ("the Company" or "APWAL") was incorporated in Nigeria on 14 October 2010 as a limited liability company to generate power in Nigeria.

On 4 January 2016, the Company commenced the construction of the Azura-Edo Independent Power Plant (IPP) project upon achieving financial close on 28 December 2015. Construction of the power plant was executed under a fully wrapped, turnkey, engineering, procurement, and construction ("EPC") contract (signed on 29 April 2014) by a consortium comprised of Siemens AG, Siemens Limited Nigeria and Julius Berger Nigeria Plc ("The Contractors"). The Azura-Edo IPP is located in Edo State and comprises three (3) gas powered turbines with heavy-duty E-class Open Cycle Gas Turbines (OCGTs). Siemens also performs the long-term maintenance service under a Long Term Maintenance Contract (LTMC).

The Contractor mobilised to site on 4 January 2016 and completed construction on 1 May 2018. Upon reaching commercial operations date (COD) on 24 May 2018, the Company commenced the sale of power under a 20-year Power Purchase Agreement (PPA) to the Nigerian Bulk Electricity Trading PLC ("NBET"). The PPA was signed on 22 April 2013 (subsequently amended on 1 December 2014 and 25 November 2015 respectively).

The Company sources gas from nearby fields through a long-term Gas Sales Purchase Agreement (GSPA) signed on 14 April 2014 (subsequently amended on 1 December 2014 and 24 November 2015) with Seplat Petroleum Development Company PLC (Seplat), an indigenous independent oil and gas company and Nigerian Petroleum Development Company (NPDC). Seplat is the operator of the Oben Gas Plant located about 50km from the Project site. The gas is transported by the Nigerian Gas Company (NGC) under The Gas Transportation Agreement (GTA) signed on 22 July 2014 (subsequently amended on 28 September 2015).

The Company incurred a profit before taxation of ₹18.42 billion for the year ended 31 December 2020 (2019: ₹12.07 billion).

Funding Arrangements

The Azura-Edo IPP funding structure is comprised of both equity and debt. The debt holders comprise sixteen (16) international and local lending institutions as well as shareholders. On 22 April 2019, the Company attained the cut-off date of disbursement in line with the provisions of the Common Terms Agreement (CTA). The remaining drawdown amount of ₹8.86 billion (\$24.50 million) was no longer available for drawdown.

Operating Results

The following is a summary of the Company's operating results:

	2020	2019
	₩'000	№ '000
Revenue	125,338,183	122,246,080
Profit/(loss) before taxation	18,415,524	12,068,291
Taxation	54,147	1,060,777
Profit/(loss) for the year	18,469,671	13,129,068

The directors have not recommended any dividend for the year ended 31 December 2020 (2019:Nil).

Directors and their Interests

The following directors were appointed/resigned during the year:

Name of Director	Nationality	Date Appointed/(Resigned)
Barry Lynch	Irish	(1 January 2020)
Chinedu Okeke	Nigerian	1 January 2020
Crispin Holliday	British	1 January 2020
David Ladipo	Nigerian	(1 January 2020)
Jason Pastorius	American	(1 June 2020)
Junaid Dikko	Nigerian	30 September 2020
Maria Stratonova	British	1 June 2020
Opuiyo Oforiokuma	Nigerian	(1 January 2020)
Sundeep Bahanda	British	(1 January 2020)
The following director was annointed sub	acquent to many and	

The following director was appointed subsequent to year end:

Tanya Abdul Ahad Canadian 15 March 2021

The following director resigned subsequent to year end:

Crispin Holliday British 12 March 2021

The Managing Director, Chinedu Okeke was appointed to the board of directors on 1 January 2020.

The directors do not have any interest required to be disclosed under Section 275 of the Companies and Allied Matters Act, Cap C.20, Laws of the Federation of Nigeria, 2004.

For the purpose of Section 277 of the Companies and Allied Matters Act, Cap C.20, Laws of the Federation of Nigeria, 2004, none of the Directors has notified the Company of any declarable interests in the contracts with the Company.

Material Agreements

The Company has entered into the following material agreements:

Gas Sales and Purchase Agreement (GSPA)

The Company entered into an agreement with Seplat Petroleum Development Company Plc (Seplat) and Nigerian Petroleum Development Company Ltd (NPDC) on 14 April 2014 (subsequently amended on 1 December 2014 and 24 November 2015) for the supply of gas from nearby fields. The tenure of the GSPA is fifteen (15) years commencing from the date Seplat starts gas deliveries to the Company, with an option for a five year renewal after the initial tenor. The GSPA contains take or pay minimum quantities of gas off-take. The Company has an obligation to provide a \$55 million irrevocable letter of credit (LC) as a security for its payment obligations which has been provided. See Note 13 to these financial statements for further information about the LC. The gas will be transported to the power plant under the Gas Transportation Agreement (GTA) signed on 22 July 2014 with the Nigerian Gas Company Limited.

Power Purchase Agreement (PPA)

The Company entered into a 20-year Power Purchase Agreement (PPA) with the Nigerian Bulk Electricity Trading Plc (NBET) on 23 April 2013 (as subsequently amended on 1 December 2014 and 25 November 2015) to sell electric power (capacity and energy) generated from its planned Power Plant in Edo State at an agreedupon pricing model and contract capacity. This agreement underlies the Company's revenue stream as it contains the terms upon which the Company's sole customer (NBET) will buy and pay for the electric energy generated from the plant after construction. It is fundamental to the project finance structure of the Company, since, without it, the Company could not have secured the requisite financing to construct the Plant.

NBET is wholly owned by the Federal Government of Nigeria (FGN) and was established as part of the Nigeria power sector reforms. NBET's obligation to pay the Company is supported by the Federal Government with underlying support which has been provided by the World Bank in the form of a Partial Risk Guarantee (PRG) and liquidity support. Multilateral Investment Guarantee Agency (MIGA) is also providing termination support to both debt and equity investors.

3 Put Call Option Agreement (PCOA)

The Put Call Option Agreement (PCOA) was executed on 22 October 2014 between the Company, Azura-Edo Limited, the Federal Government of Nigeria ("FGN"), and Nigerian Bulk Electricity Trading Plc ("NBET"). Should the PPA ever have to be terminated, the PCOA sets out the terms and conditions under which the FGN and/or NBET will have a right or an obligation (or both) to purchase the shares or the assets of the Company from its owners (Azura-Edo Limited); and in each case, the price that must be paid therefore.

4 Common Terms Agreement and Loan Financing Agreements

The Common Terms Agreement (CTA) was executed on 27 November 2014 and provides a common framework of understanding for the lender consortium. The CTA was amended and restated on 9 December 2015 principally to align the contractual timelines surrounding disbursements, interest payments and principal repayments with the realities in view of the unforeseen delay to financial close.

The lender consortium comprises CDC Group Plc; DEG – Deutsche Investitions – Und Entwicklungsgesellschaft Mbh; ICF Debt Pool LLP; International Finance Corporation; Nederlandse Financierings-Maatschappij Voor Ontwikkelingslanden N.V.; Société De Promotion et de Participation pour la Coopération Économique S.A.; Swedfund International AB; Overseas Private Investment Corporation; The Emerging Africa Infrastructure Fund Ltd; Firstrand Bank Limited (Acting through its Rand Merchant Bank Division); Siemens Bank GMBH; The Standard Bank of South Africa Limited; Standard Chartered Bank; First City Monument Bank Limited and KFW IPEX-Bank GMBH and Mauritius Commercial Bank Limited.

Sixteen (16) individual loan financing agreements between the Company and the above suite of lenders were also executed between 25-27 November 2014 and contain specific payment requirements and account funding requirements that are customary for power project financing transactions of this nature. Lenders provided \$566.5 million and N24 billion of long-tenor senior and mezzanine financing for the project as follows:

- \$501.5 million of offshore Senior Debt Facilities, which includes a \$55 million of a GSPA Letter of Credit facility.
- \$65 million of offshore USD Mezzanine Debt Facilities, which is funded by Development Finance Institutions (DFIs).
- N24 billion of an Onshore Senior Debt Facility, provided through the Bank of Industry (BOI) Power and Airline Intervention Fund (PAIF)) concessional window.

5 Maintenance Contracts

The maintenance contracts include the Operation and Maintenance Agreement signed on 5 May 2014 (as amended), which appoints PIC Group to operate and maintain the power plant. The Long Term Maintenance Contract (LTMC) was also executed on 24 July 2014 (as amended) between the Company, Siemens Limited Nigeria and Siemens AG. The LTMC sets out the terms for long term maintenance services comprising parts, repairs, and scheduled outages. These agreements became effective on 31 December 2015.

6 Grid Connection and Ancillary Services Agreements

On 24 June 2014, the Company entered into two agreements with the Transmission Company of Nigeria (TCN) Plc; Grid Connection Agreement which provides the terms and conditions for connection of the power plant with the Transmission Network System of TCN and Ancillary Services Agreement that provides for additional services.

As part of the Company's corporate governance activities, the Company set up the Board Audit and Risk Committee (BARC) on 13 May 2016. BARC is mainly responsible for the financial reporting matters of the Company which includes the review of the audited financial statements, review of the Company's budgets and recommendation of the financial statements to the Company's board of directors for approval, among others.

Members of the BARC are as follows:

- (a) Simon Harford
- (b) Emile du Toit
- (c) Junaid Dikko
- (d) Tanya Abdul Ahad

Shareholding Structure

The shareholding structure of the Company is as follows:

Ordinary Shares of N1 each 2020 **%** 2019 **%** Number Number 3,777,564 97.5 Azura-Edo Limited 3,777,564 97.5 2.5 96,860 2.5 **Edo State Government** 96,860 3,874,424 100 3,874,424 100

Azura-Edo Limited has charged all its shares in the Company in favor of the Company's external lenders until all obligations to the lenders have been fully discharged.

Charitable Donations

During the year, the Company incurred costs amounting to ₹288.36 million (2019: ₹114.48 million) on corporate social responsibility programmes and ₹1.60 million on christmas gifts. (2019: ₹3.24 million). This was included in profit or loss as part of donations. See Note 7(a) in these financial statements. The Company did not make any donation to any political association, or for any political purpose in the course of the year (2019: Nil).

Employment and Employees

(a) Employee Consultation and Training

The Company places considerable value on the involvement of its employees in major policy matters and keeps them informed on matters affecting them as employees and on various factors affecting the performance of the Company. This is achieved through regular meetings with employees and consultations with their representatives.

(b) Dissemination of Information

In order to maintain shared perception of our goals, the Company is committed to communicating information to employees in as fast and effective a manner as possible. This is considered critical to the maintenance of team spirit and high employee morale.

(c) Employment of Physically Challenged

The Company has no physically challenged persons in its employment (2019:Nil). However, the Company's employment policy does not discriminate against any individual for reasons of his/her infirmity as each employment case is purely treated on merit.

(d) Employee Health, Safety and Welfare

The Company places a high premium on the health, safety and welfare of its employees in their place of work. In order to protect staff and other persons against risk to health and safety hazards arising out of or in connection with the Company's planned construction activities, the Company has established an Environmental, Health, and Safety (EH&S) management system. The Company has also put in place various forms of insurance policies, including workmen compensation insurance and life insurance to adequately secure and protect its employees.

Property, Plant and Equipment

Information relating to changes in property, plant and equipment is disclosed in Note 11(a) to these financial statements.

Events after the reporting date

Events after reporting date has been disclosed in note 32 of this financial statements.

Functional and presentation currency

The Company's functional currency is US Dollar which is different from the presentation currency in Nigerian Naira. Assets and liabilities for each statement of financial position presented are translated at the closing rate of \$1 - ₹395. Income and expenses for each statement presenting profit or loss and other comprehensive income are translated at the exchange rate at the date of the transactions.

Independent Auditor

Messrs. PricewaterhouseCoopers Chartered Accountants, having satisfied the relevant corporate governance rules on their tenure in office have indicated their willingness to continue in office as auditors to the Company. In accordance with Section 357 (2) of the Companies and Allied Matters Act, Cap C.20, Laws of the Federation of Nigeria, 2004, therefore, the auditors will be re-appointed at the next annual general meeting of the Company without any resolution being passed.

BY ORDER OF THE BOARD

Company Secretaries

Lagos, Nigeria 29 April 2021 ALSEC Nominees Limited Company Secretary

Statement of directors' responsibilities in relation to the financial statements for the year ended 31 December 2020

The directors accept responsibility for the preparation of the annual financial statements that give a true and fair view in accordance with International Financial Reporting Standards and in the manner required by the Companies and Allied Matters Act, Cap C.20, Laws of the Federation of Nigeria, 2004 and Financial Reporting Council of Nigeria Act, 2011.

The directors further accept responsibility for maintaining adequate accounting records as required by the Companies and Allied Matters Act, Cap C.20, Laws of the Federation of Nigeria, 2004 and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

The directors have made an assessment of the Company's ability to continue as a going concern and have no reason to believe the Company will not remain a going concern in the year ahead.

Statement of corporate responsibility for financial statements for the year ended 31 December 2020

The Chief Executive Officer and Chief Financial Officer of Azura Power West Africa Limited have reviewed the audited financial statements and accept responsibility for the financial and other information within the annual report. The following certifications and disclosures regarding the true and fair view of the financial statements as well as the effectiveness of the Internal Controls established within the Company are hereby provided below:

Financial Information

- i. The audited financial statements do not contain any untrue statement of material fact or omit to state a material fact, which would make the statements misleading.
- ii. The audited financial statements and all other financial information included in the statements fairly present, in all material respects, the financial condition and results of operation of the Company as of and for the period ended 31 December 2020.

Effective Internal Controls

- Effective internal controls have been designed to ensure that material information relating to Company are made known by the relevant staff, particularly during the period in which the audited financial statement is being prepared.
- ii. The effectiveness of the Company's internal controls have been evaluated within 90 days prior to 31 December 2020
- iii. The Company's internal controls are effective as at 31 December 2020.

Disclosures

- i. There were no significant deficiencies in the design or operation of internal controls which could adversely affect the Company's ability to record, process, summarize and report financial data. Furthermore, there were no identified material weaknesses in the Company's internal control systems.
- ii. There were no fraud events involving Senior Management or other employees who have significant role in the Company's internal control.
- iii. There were no significant changes in internal controls or in other factors that could significantly affect internal controls.

Independent auditor's report

To the Members of Azura Power West Africa Limited

Report on the audit of the financial statements

Our opinion

In our opinion, Azura Power West Africa Limited's ("the company's") financial statements give a true and fair view of the financial position of the company as at 31 December 2020, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies and Allied Matters Act and the Financial Reporting Council of Nigeria Act.

What we have audited

Azura Power West Africa Limited's financial statements comprise:

- the statement of financial position as at 31 December 2020;
- the statement of profit or loss and other comprehensive income for the year then ended;
- · the statement of changes in equity for the year then ended;
- · the statement of cash flows for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards), i.e. the IESBA Code issued by the International Ethics Standards Board for Accountants. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

Other information

The directors are responsible for the other information. The other information comprises the Directors' Report, Statement of Directors' Responsibilities, Value Added Statement and Five-Year Financial Summary, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors and those charged with governance for the financial

The directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with International Financial Reporting Standards and the requirements of the Companies and Allied Matters Act, the Financial Reporting Council of Nigeria Act, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or
 error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is
 sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
 misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
 collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
 are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness
 of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based
 on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that
 may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a
 material uncertainty exists, we are required to draw attention in our auditor's report to the related
 disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our
 conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future
 events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the
 disclosures, and whether the financial statements represent the underlying transactions and events in a
 manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

The Companies and Allied Matters Act requires that in carrying out our audit we consider and report to you on the following matters. We confirm that:

- i) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
- ii) the company has kept proper books of account, so far as appears from our examination of those books and returns adequate for our audit have been received from branches not visited by us;
- iii) the company's statement of financial position and statement of profit or loss and other comprehensive income are in agreement with the books of account and returns.

1. Reporting entity

Azura Power West Africa Limited ("the Company") was incorporated in Nigeria on 14 October 2010 as a limited liability company to generate power in Nigeria. The Company is a subsidiary of Azura-Edo Limited, a Company registered and domiciled in Mauritius.

The Company is domiciled in Nigeria. The Company's registered office is at St Nicholas House, 10th Floor, Catholic Mission Street, Lagos.

2. Basis for preparation

(a) Statement of compliance

These financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and in the manner required by the Companies and Allied Matters Act, Cap C20, Laws of the Federation of Nigeria, 2004 and the Financial Reporting Council of Nigeria Act, 2011.

These financial statements were authorised for issue by the Company's Board of Directors on 29 April 2021.

(b) Basis of measurement

These financial statements have been prepared on the historical cost basis except for certain items of financial instruments that are measured at fair value (See Note 26(f) to these financial statements).

Details of the Company's significant accounting policies are included in Note 5(c)(v) and the methods used to determine fair values for initial recognition and disclosure purposes are discussed further in Note 3(iii).

(c) Functional and presentation currency

As a result of the ruling by the Financial Reporting Council of Nigeria stating that the presentation currency of entities operating in Nigeria is the Nigerian Naira, the Company has retained its presentation currency for its statutory financial statements as Nigerian Naira (N). All financial information presented in Naira have been rounded to the nearest thousand (N'000), except where otherwise indicated.

Translation to the presentation currency

The Company's functional currency (US Dollar) is different from the presentation currency (Nigerian Naira). The results and financial position of the Company are translated into the presentation currency as follows:

- assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;
- income and expenses for each statement presenting profit or loss and other comprehensive income are translated at the exchange rate at the date of the transactions;
- cash flows are translated at at the exchange rate at the date of the transactions;
- all resulting exchange differences are recognised as a separate component of equity through other comprehensive income.

3. Use of estimates and judgments

In preparing these financial statements, the directors have made estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

(i) Judgements

Interest rate benchmark reform

Following the financial crisis, the reform and replacement of benchmark interest rates such as USD LIBOR and other interbank offered rates ('IBORs') has become a priority for global regulators. There is currently uncertainty around the timing and precise nature of these changes to transition existing contracts and agreements that reference USD LIBOR to Secured Overnight Financing Rate (SOFR).

Relief applied

The Company has applied the following reliefs that were introduced by the amendments made to IFRS 9 Financial

- When considering the 'highly probable' requirement, the Company has assumed that the USD LIBOR interest rate on which the Company's hedged debt is based does not change as a result of IBOR reform.
- In assessing whether the hedge is expected to be highly effective on a forward-looking basis the Company has assumed that the USD LIBOR interest rate on which the cash flows of the hedged debt and the interest rate swap that hedges it are based is not altered by LIBOR reform.
- The Company has not recycled the cash flow hedge reserve relating to the period after the reforms are expected to take effect.

Assumptions made

In calculating the change in fair value attributable to the hedged risk of floating-rate debt, the Company has made the following assumptions that reflect its current expectations:

- The floating-rate debt will move to SOFR during 2022 and the spread will be similar to the spread included in the interest rate swap used as the hedging instrument.
- No other changes to the terms of the floating-rate debt are anticipated.
- The Company has incorporated the uncertainty over when the floating-rate debt will move to SOFR, the resulting adjustment to the spread, and the other aspects of the reform that have not yet been finalised by adding an additional spread to the discount rate used in the calculation.

(ii) Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the year ending 31 December 2020 is included in the following notes:

- Notes 20: Interest rate swap: Estimate of future cash flows of the hedged item and the hedging instrument based on the respective contract terms.
- Note 26(a) Measurement of Expected Credit Loss (ECL) for assessment of trade receivables impairment allowance: key assumptions in determining the weighted-average loss rate.
- Note 10(d) Recognition of deferred tax assets: availability of future taxable profit against which deductible temporary differences and tax losses carried forward can be utilised based on the financial model as adopted by the Company and its external lenders.

(iii) Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both the financial and non-financial assets and liabilities.

The Company has an established control framework with respect to the measurement of fair values. The Chief Financial Officer (CFO) has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the Board of Directors.

The Chief Financial Officer (CFO) regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the CFO assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of IFRS, including the level in the fair value hierarchy in which such valuations should be classified. Significant valuation issues are reported to the Board of Directors.

When measuring the fair value of an asset or a liability, the Company uses market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

• Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in the following note:

• Note 26(f) - Fair values

4. Changes in accounting policies

(a) New and amended standards adopted by the Company

The Company has not applied the following new or amended standards in preparing these financial statements.

- Definition of Material Amendments to IAS 1 and IAS 8
- Definition of a Business Amendments to IFRS 3
- Revised Conceptual Framework for Financial Reporting, and
- Interest Rate Benchmark Reform Amendments to IFRS 9, IAS 39 and IFRS 7

(b) New standards and interpretations not yet adopted

Certain new accounting standards and interpretations have been published that are not mandatory for 31 December 2020 reporting periods and have not been early adopted by the Company. These standards are not expected to have a material impact on the entity in the current or future reporting periods and on foreseeable future transactions.

5. Significant accounting policies

The Company has consistently applied the following accounting policies to all years presented in these financial statements except if mentioned otherwise (See Note 4).

(a) Finance income and finance costs

The Company's finance income and finance costs include:

- foreign currency gain or loss on financial assets and financial liabilities;
- interest expense on borrowings;
- interest expense on lease liabilities;
- unwinding of the discount on provisions and contingent settlements;
- interest on receivables;
- other financial and transaction costs:
- reclassification of net gains/losses previously recognised in OCI on cashflow hedges

Except borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset which are capitalised as part of the related assets, finance costs are recognised in profit or loss using the effective interest method.

Foreign currency gains and losses are reported on a net basis as either finance income or finance costs depending on whether foreign currency movement are in a net gain or net loss position.

(b) Foreign currency transactions

Transactions in foreign currencies are translated into the US Dollar at the exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction. Foreign currency differences are generally recognised in profit or loss and presented within finance cost or income except where they are regarded as an adjustment to borrowing costs and as such capitalised as part of property, plant and equipment.

However, foreign currency differences arising from the translation of the following items are recognised in other comprehensive income:

• qualifying cash flow hedges to the extent that the hedges are effective.

(c) Financial instruments

(i) Recognition and initial measurement

Trade receivables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

(ii) Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; FVOCI –debt investment; FVOCI – equity investment; or FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets - Business model assessment

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a reasonable margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- prepayment and extension features; and
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

Financial assets - Subsequent measurement and gains and losses

	-
Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss. However, see note $5(c)(v)$ for derivatives designated as hedging instruments.
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

Financial liabilities - Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

See Note 5(c)(v) for financial liabilities designated as hedging instruments.

(iii) Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

If there is a change in the timing or amount of estimated cash flows, then the amortised cost of the financial liability (or group of financial instruments) is adjusted in the period of change to reflect the revised actual and estimated cash flows, with a corresponding income or expense being recognised in profit or loss.

(iv) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

(v) Derivative financial instruments and hedge accounting

The Company holds derivative financial instruments to hedge its interest rate risk exposures. The Company uses derivative financial instruments, such as forward currency contracts, interest rate swaps and forward commodity contracts, to hedge its foreign currency risks, interest rate risks and commodity price risks, respectively. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment
- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment
- Hedges of a net investment in a foreign operation

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which it wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

The documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Company will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument.
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Company actually hedges and the quantity of the hedging instrument that the Company actually uses to hedge that quantity of hedged item.

Cashflow Hedges

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognised in OCI and accumulated in the hedging reserve. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in profit or loss.

The amount accumulated in equity is retained in OCI and reclassified to profit or loss in the same period or periods during which the hedged forecast cash flows affect profit or loss or the hedged item affects profit or loss.

If the forecast transaction is no longer expected to occur, the hedge no longer meets the criteria for hedge accounting, the hedging instrument expires or is sold, terminated or exercised, or the designation is revoked, then hedge accounting is discontinued prospectively. If the forecast transaction is no longer expected to occur, then the amount accumulated in equity is reclassified to profit or loss.

(d) Share capital

The Company has only one class of shares, ordinary shares. Ordinary shares are classified as equity. When new shares are issued, they are recorded in share capital at their par value. The excess of the issue price is recorded in the share premium reserve.

Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from equity. Income tax relating to transaction costs of an equity transaction is accounted for in accordance with IAS 12.

(e) Impairment

Non-derivative Financial Assets

Financial instruments and contract assets

The Company recognises loss allowances for ECLs on:

- financial assets measured at amortised cost; and
- contract assets.

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- debt securities that are determined to have low credit risk at the reporting date; and
- other receivables and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowances for trade receivables are always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- the financial asset is more than 45 days and 15 business days past due.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).

ECLs are discounted at the effective interest rate of the financial asset. Financial assets not classified at fair value through profit or loss are assessed at each reporting date.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write-oft

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. The Company makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

Non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or Cash Generating Units (CGU).

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable parties.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its estimated recoverable amount.

Impairment losses are recognised in profit or loss. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(f) Taxation

Income tax expense comprises current tax (company income tax and tertiary education tax) and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

The Company had determined that interest and penalties relating to income taxes includes uncertain tax treatments.

(i) Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year, and any adjustment to tax payable or receivable in respect of previous years.

The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date and is assessed as follows:

- Company income tax is computed on taxable profits
- Tertiary education tax is computed on assessable profits

Total amount of tax payable under CITA is determined based on the higher of two components namely Company Income Tax (based on taxable income (or loss) for the year); and minimum tax. Taxes based on profit for the period are treated as income tax in line with IAS 12.

Minimum tax

Minimum tax which is based on a gross amount is outside the scope of IAS 12 and therefore, are not presented as part of income tax expense in the profit or loss.

Minimum tax is determined based on the sum of:

- 0.5% of revenue applicable to companies with no total profit or whose computed tax is less than the minimum tax. Franked investment income will be excluded for the purpose of the minimum tax computation.

Where the minimum tax charge is higher than the Company Income Tax (CIT), a hybrid tax situation exists. In this situation, the CIT is recognised in the income tax expense line in the profit or loss and the excess amount is presented above the income tax line as minimum tax.

The Company offsets the tax assets arising from withholding tax (WHT) credits and current tax liabilities if, and only if, the entity has a legally enforceable right to set off the recognised amounts, and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously. The tax asset is reviewed at each reporting date and written down to the extent that it is no longer probable that future economic benefit would be realised

As stated in Note 2(c), the Company's functional currency is the US Dollars. The Company's taxable profit or tax loss (and, hence, the tax base of its non-monetary assets and liabilities) is also determined in USD. The Company however elects to convert the taxable profit or loss to Naira for payment purposes in accordance with the Companies Income Tax act (CITA). While section 54 of the CITA requires that taxes are paid in the currency in which the transaction giving rise to it was effected, the translation of the tax liability from USD to Naira is a practical solution that allows the Company pay its taxes in Naira and reduce the need to source for foreign exchange for this purpose.

(ii) **Deferred tax**

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax is not recognised for

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss.
- temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on the reversal of relevant taxable temporary differences.

If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on the business plans of the Company as approved by the shareholders. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date, and reflects uncertainty related to income taxes, if any.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities shall be offset if, and only if:

- there is a legally enforceable right to set off current tax assets and liabilities, and

- the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either:
- i. the same taxable entity, or
- ii. different taxable entities which intend to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Gas Utilisation Incentive (GUI) Tax Regime

The GUI is available to Companies engaged in the utilisation of gas. Under the incentive, companies are entitled to:

- A tax-free period of three years which may be renewed for further two years OR 35% investment allowance.
- Accelerated capital allowance after the tax-free period.
- Tax free dividends during the tax-free period.

The Company was granted the Gas Utilization Incentive (GUI) under Section 39 of the CITA following the certification of commercial production date by the Federal Minister of Petroleum. The incentive grants a tax holiday to the Company effective May 2018 and expiring after three (3) years in May 2021, in the first instance, and renewable for another two years, subject to satisfactory performance.

(g) Property, plant and equipment

Generation Assets

Generation assets include the operating assets which the Company uses in carrying out its normal course of business; generating power to Nigerian Bulk Electricity Trading PLC (NBET). These assets include the power plant equipment, plant spares, and the plant's buildings.

The Company's generation assets are stated at cost less accumulated depreciation and impairment losses.

Non-generation Assets

The Company's non-generation assets are all other assets other than generating assets. Non-generation assets include land, administrative office building, furniture and fittings, motor vehicles, etc. Depreciation is on a straight-line method over the estimated useful lives of the assets. Land is not depreciated.

(i) Recognition and measurement

Items of property, plant and equipment are measured at cost, which includes capitalised borrowing costs, less accumulated depreciation and accumulated impairment losses.

If significant parts of an item of property or equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in profit or loss.

(ii) Subsequent expenditure

Subsequent expenditure is capitalised only when it is probable that the future economic benefits of the expenditure will flow to the Company. When part of an asset is being replaced, the carrying amount of the replaced part is derecognized. Repairs and maintenance are charged to profit or loss during the financial period incurred.

(iii) Depreciation

Depreciation is calculated to write off the cost of items of property, plant and equipment less their estimated residual values using the straight-line method over their estimated useful lives, and is generally recognised in profit or loss, unless the amount is included in the carrying amount of another asset.

The Company's generating plants are generally depreciated using the unit of production method based on the machine usage hours over the estimated operating capacity of the assets.

Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term. Land is not depreciated.

Significant parts of an item of property, plant and equipment that have different useful lives are accounted for as separate items (major components).

Spare parts and replacement materials of significant importance to the generation assets and whose useful lives are greater than one year (either utilised or not) are classified as part of generation assets in line with IAS 16 – Property, Plants and Equipment and are depreciated accordingly when they are available for use.

The estimated useful lives of property, plant and equipment for current and comparative periods are as follows:

Type of Asset	Basis
Generation Assets	
Power plant equipment	Unit of Production method based on Equivalent Operating Hours of the plant (EOH)
Componentised replacement	
parts and spares	4 years
Generation Plant Building	20 years
Non Generation Assets	
Motor vehicles	4 years
Office equipment	4 years
Furniture and fittings	4-10 years
Computer equipment	3 years
Plant and machinery	4 years
Building and fixtures	20 years
Land	Unlimited

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate. Property, plant and equipment under construction are not depreciated. The attributable cost of each asset is transferred to the relevant asset category immediately the asset is available for use and depreciated accordingly.

(iv) Capitalisation of borrowing costs

Borrowing costs from specific and general borrowings as well as foreign exchange differences on foreign currency borrowings that are regarded as an adjustment to interest costs and are attributable to the construction of qualifying assets are capitalised as part of the cost of the qualifying assets over the period of construction, until the asset is substantially ready for its intended use, to the extent that there are qualifying assets and borrowing costs have been incurred. Borrowings costs incurred after the completion of construction of a qualifying asset is recognised as an expense.

(h) Intangible assets

Recognition and measurement

Intangible assets that are acquired by the Company and have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses.

The Company's intangible assets with finite useful lives comprise power generation licence cost and software.

Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific intangible

Amortisation of intangible assets

Amortisation is calculated over the cost of the asset, or other amount substituted for cost, less its residual value. Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets from the date that they are available for use. The estimated useful lives for acquired power generation licence and software are 10 years and 4 years respectively. Amortisation of the licence commenced on the power generation date till the date of expiry of the licence and as such will amortised effectively over 102 months.

(i) Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company uses the definition of a lease in IFRS 16

As a lessee

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

The right-of-use asset are generally depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

The Company determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

(j) Provisions and contingent liabilities

Provisions

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Contingent liabilities

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company, or a present obligation that arises from past events but is not recognised because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or the amount of the obligation cannot be measured with sufficient reliability.

Contingent liabilities are only disclosed and not recognised as liabilities in the statement of financial position.

If the likelihood of an outflow of resources is remote, the possible obligation is neither a provision nor a contingent liability and no disclosure is made.

(k) Employee benefits

(i) Defined contribution plan

A defined contribution plan is a post-employment benefit plan (pension fund) under which the Company pays fixed contributions into a separate entity. The Company has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. Obligations for contributions to defined contribution plans are expensed as the related service is provided and recognised as personnel expenses in profit or loss. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

In line with the provisions of the Pension Reform Act 2014, the Company has instituted a defined contribution pension scheme for its employees. Staff contributions to the scheme are funded through payroll deductions while the Company's contribution is recognised in profit or loss as employee benefit expense in the periods during which services are rendered by employees. Employees contribute 8% each of their Basic salary, Transport and Housing Allowances to the Fund on a monthly basis. The Company's contribution is 10 % of each employee's Basic salary, Transport and Housing Allowances.

(ii) Termination benefits

Termination benefits are expensed at the earlier of when the Company can no longer withdraw the offer of those benefits and when the Company recognises costs for a restructuring. If benefits are not expected to be wholly settled within 12 months of the end of the reporting date, then they are discounted.

(iii) Short-term employee benefits

Short-term employee benefit obligations are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

(l) Government grants

Gains on loan at an interest rate lower than the market rate (the difference between the fair value and face value of the loans) is recognised as government grants. Government grants are initially recognised as deferred income at fair value if there is reasonable assurance that they will be received and the Company will comply with the conditions associated with the grant, they are then recognised in profit or loss as other income on a systematic basis over the useful life of the asset they relate to.

(m) Statement of cash flows

The statement of cash flows is prepared using the indirect method. Changes in statement of financial position items that have not resulted in cash flows have been eliminated for the purpose of preparing the statement. Interest paid, including interest paid relating to property, plant and equipment, is included in financing activities while finance income received is included in investing activities.

(n) Inventories

Inventories are measured at the lower of cost and net realisable value. The cost of inventories includes expenditure incurred in acquiring the inventories and other costs incurred in bringing them to their existing location and condition and is based on:

Product type

Spare parts and other consumables Natural gas

Cost basis

Purchase cost on a weighted average basis Purchase cost on a weighted average basis

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

(o) Revenue

Revenue from the sale of power in the course of ordinary activities is measured at the fair value of the consideration received or receivable, net of value added tax. Revenue (capacity and energy) is the total tariff price as indicated in the Power Purchase Agreement (PPA) with Nigeria Bulk Electricity Trading Plc (NBET) at the time the utility service is rendered. Revenue is earned over a period of time in line with the continous generation of power signed in the PPA.

The Company currently generates its revenue from various components of the tariff as follows; capacity generated, energy shared, reimbursables and the startup revenue.

Capacity generated

Capacity generated is the net generating capacity of the Plant at reference site conditions, measured in megawatts (MW) and available for dispatch at any given time in the absence of any availability event. Revenue is recognised for capacity based on a preagreed tariff set out in the Power Purchase Agreement and the megawatts available for each billing period. Capacity revenue is earned over a period of time.

Energy delivered

Energy delivered is the actual electricity delivered to NBET which is measured in kilowatt-hours (kWh). Revenue is recognised for energy delivered based on a pre-agreed tariff set out in the PPA and the net electrical output delivered to the customer at the delivery point as defined in the PPA. Revenue is recognised when title to, and control of the electricity is passed to the customer (NBET) i.e. when electricity is delivered to the delivery point in accordance with the PPA. Energy revenue is earned over a period of time.

Performace obligations

On the basis that the customer, NBET cannot benefit from capacity payments on its own and capacity and energy delivered are not sold seperately in the electricity market in Nigeria, the Company has considered both to be a single performance obligation.

Reimbursable revenue

Reimbursable revenue represents Gas supply payments, Gas transport payments, Gas take or pay payments and licence charges due to Nigerian Electricity Regulatory Commission (NERC) which are charged back to NBET. Reimbursable revenue is recognised based on the formulas described in the Power Purchase Agreement. Reimbursable revenue is earned over a period of ...

Take or pay costs and income are recorded in profit or loss because the Company has estimated that it will never utilise the take-or-pay gas which could only be carried forward for the next two years based on the Company's current and forecasted dispatch rate by Transmission Company of Nigeria (TCN).

Start up revenue

Start up revenue are amounts charged to NBET for the number of times the power plant's generating units are started in a billing period in excess of the agreed free starts in the PPA. Start up revenue is earned at a point in time.

The PPA with NBET is for a period of twenty (20) years (ending 23 May 2032) and cannot be unilaterally terminated by either party without paying a substantive peanalty to the other party. See note 30 for details of the PCOA relating to the PPA.

(p) Contract costs

The Company capitalises incremental costs incurred in the construction of certain assets which were transferred to both NGC and TCN as they were incurred because of its Power Purchase Agreement with NBET. These capitalised contract costs are amortised over the life of the contracts signed with both NGC and TCN respectively.

Contract costs are recovered overtime from the tariff agreed with the offtaker over the life of the Power Purchase Agreement.

At each reporting date, the Company reviews the carrying amounts of the contract costs to determine whether there is any indication of impairment. If any such indication exists, then the recoverable amount is estimated.

Revenue	2020	2019
	N '000	N '000
Capacity made available	69,856,060	69,544,512
Energy delivered	2,930,859	2,048,824
Reimbursables	52,512,081	50,464,402
Start-up revenue	39,183	188,342
	125,338,183	122,246,080

The revenue above represents revenue generated from contract with a single customer and is earned at a point in time and over a period of time. All the revenue is earned in Nigeria. Invoices to the customer are payable within 15 business days and no discounts are provided.

	Capacity made	Energy

Total administrative expenses	5,754,311	6,239,230
Total expenses	77,631,648	73,699,105

- (i) Amount represents take-or-pay costs of gas incurred in accordance with the Gas Purchase and Sales Agreement (GSPA). Take or pay costs are recorded in profit or loss because the Company has estimated that it will more likely than not, be unable to utilise the take- or-pay gas based on the Company's forecast. During the year 2020, the Company did not incur any take or pay costs (2019: ₹7.62 billion) because it surpassed the obligated 80% of the annual contract quantity utilization in line with the GSPA.
- (ii) Amount represents regulatory charges due to the Nigerian Electric Regulatory Commission (NERC) under the provisions of the NERC (License and Operations fee) Regulations, 2010, and is calculated as 1.5% of licensee's charges/kWh over the period.
- (iii) Included in insurance is the guarantee premium for Partial Risk Guarantee (PRG) and Multilateral Investment Guarantee Agency (MIGA) of ₹2.88 billion (\$6.71 million) (2019: ₹2.43 billion (\$6.71 million)) paid on the amounts drawn down as of the year end on the PRG and MIGA covered loan facilities. These are requirements of the Common Terms Agreement (CTA). See Note 21(a)(ii).
- (iv) Included in current year donations is an amount of ₹288.36 million (2019: ₹114.48 million) spent on corporate social responsibility and ₹1.60 million (2019: ₹3.24 million) spent on Christmas gifts.

(b) Other income

	(30,782,113)	(38,043,207)
Net finance costs	(29,999,118)	(37,679,092)

(a) Interest income represents interest charged on late payment of energy invoices issued to Nigeria Bulk Electricity Trading Plc (NBET). The interest is charged at 2% plus 3-Months LIBOR per annum on the USD past due receivables and 2% plus 3-Months NIBOR per annum on the Naira past due receivables.

- (b) Other financing fees represents costs incurred on commitment fees, monitoring fees, withholding tax on interest payment, waiver fees and other lender related fees incurred during the year as servicing fees for the Company's external loan facilities.
- (c) Transaction cost represents charges arising from forward hedging transactions entered into during the year.

9 Profit/(loss) before taxation

(a) (i) Profit/(loss) before taxation is stated after charging/(crediting):

7,000,001 - 11,000,000	2	1
Above 11,000,000	9	7
	23	24

(iv) The directors of the Company did not receive any remuneration as Directors during the year (2019: Nil).

10 Taxation

(a) Tax recognised in profit or loss

The Company is subject to corporate income tax under the Company Income Tax (CIT) Act as amended to date and Tertiary Education Tax (TET) Act. However, the Company obtained a Gas Utilization Incentive (GUI) Certificate which exempts the Company from some income taxes on income generated from its principal business activity in the GUI period. The Company's GUI period commenced on 24 May 2018. Under the GUI Scheme, the Company is granted a tax holiday for an initial period of three tax years which may be extended for up to two years upon satisfaction of specified conditions.

(b) Leases

Leases as lessee

The Company has two (2) leased properties during the year namely rent of guest house and rent of the administrative office in Abuja. The lease period is from 4 years to 5 years respectively. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability. The lease of the Abuja office has an option to extend for another 2 years after the expiration of the current lease term. The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

Incremental borrowing rate has been determined to be 14.5%

(c) Collateral on loan security

The Company has funding arrangements with sixteen (16) international and local lending institutions for a total facility amounting to \$566.5 million and ₹24 billion (\$120.3 million) under the Common Terms and Agreement. The Company has granted charge over its assets and claims as security for its obligation under the agreement and has also assigned all present and future rights of it's offshore contracts as security to it's lenders. This arrangements continues until all obligations to the lenders have been fully discharged by the Company.

⁽a) Licence costs represents costs incurred in obtaining a power generation licence from the Nigerian Electricity Regulatory Commission (NERC) in 2011 for on-grid electricity generation. The licence was originally valid for 10 years (until November 2021). In 2012, the Company obtained an extension of the licence for an additional 5 years i.e. until November 2026. The intangible assets are amortised on a straight line basis.

Contract costs represent upfront costs incurred by the Company on the construction of gas metering station, interconnection pipeline and substation that were transferred to TCN and NGC upon completion of construction on 1 May 2018 in accordance with the Supplemental agreement to the Gas Transport Agreement signed with NGC and the transmission line and substation extension agreement signed with TCN. These costs have been capitalised as upfront costs as at year end. These costs are amortised over the life of the contracts signed with TCN and NGC.

The cost incurred on the contract assets are recoverable from the tariff agreed with the offtaker over the life of the Power Purchase Agreement (PPA).

- * Predetermined rates are rates set by FMO and notified to the Company.
- ** OPIC Cost of funds are fixed rates of interest determined in accordance with the monthly average "U.S. Treasury Constant Maturity Yields" for relevant calendar month as published in statistical release of the Board of Governors of the Federal Reserve System.
- *** During the interest payment dates of 15 May 2020 and 15 November 2020, the Company was unable to pay the Mezzanine lenders in the loan's currency due to unavailability of foreign exchange in the market. The unpaid interest and principal amounted to \$14.02 million. The unpaid mezzanine amounts were automatically converted to Mezzanine Deferred Loans as per the financing agreements. This scenario does not constitute an event of default under the loan agreement.

(i) On 1 December 2014, the Company entered into a seven year shareholder loan agreement with Azura-Edo Limited (which extinguished the Development Cost Loan Agreement (DCLA) entered in 2013, as amended), with a facility amount of \$118.71 million.

On 24 May 2018, the Company attained Commercial Operation Date (COD) consistent with previous estimates used by the directors in estimating cashflows of the loan. This loan is subordinated in favour of loans from the external lenders (Note 21(a)(ii)) and is unsecured.

Repayment of interest and principal under the loan agreement are based on availability of surplus cash as defined in the shareholder loan agreement. During the year, the Company re-estimated the expected timing and amount of the cashflows under the loan agreement. The significant changes in the timing and amount of cashflows significantly affects the carrying amount of the loan (See Note 21(c)).

During the year, the total interest accrued on the loan amounted to ₹15.59 billion (\$40.84 million) (2019: ₹13.51 billion (\$37.58 million)) while a gain as a result of changes in the cashflows amounting to ₹2.66 billion (\$6.88 million) (2019: ₹1.59 billion (\$4.39 million)) was recorded during the year. There were no drawdowns on the loan during the year as the total facility amount was fully drawn down in 2015. See Note 21(c).

- (ii) On 9 December 2015, the Company entered into an amended and restated Common Terms Agreement (CTA) between the Borrower (the Company), the DFI Lenders, Original IBRD Covered Lenders, the Original MIGA Covered Lenders, the Original Local Lender (PAIF), the Mezzanine Lenders, the Global Mandated Lead Arranger and Structuring Bank, the Joint Mandated Lead Arranger, the Co-Lead DFI Arrangers, the Local Loan Arranger, the IBRD Facility Agent, the MIGA Facility Agent, the Local Facility Agent, the Intercreditor Agent and the Hedging Banks. Under the Senior Loan Agreements, Mezzanine Loan Agreements and the Local Loan Agreement, the amount committed by the various lenders are \$501.5 million, \$65 million and \$150 million respectively. The Company has granted charge over its assets and claims as security for its obligation under the CTA and this arrangement continues until all obligations to these lenders have been fully discharged by the Company. Also, Azura-Edo Limited has charged all its shares in the Company in favour of these external lenders until all obligations to the lenders have been fully discharged.
- (iii) On 23 December 2015, the Company issued a promissory note to Edo State Government with a nominal value of \$3.33 million in accordance with the subscription agreement with the Company.

 The amounts owed pursuant to this promissory note are unsecured. Interest shall accrue on this promissory note at

20.2% from the date of the promissory note up to the Commercial Operation Date (COD) and 15% from COD to final repayment date. During the year, the Company re-estimated the expected timing and amount of the cashflows under the loan agreement. The significant changes in the timing and amount of cashflows significantly affects the carrying amount of the loan

As at the year end, the carrying value of the promissory note was ₹2.19 billion (\$5.55 million) (2019: ₹1.73 billion (\$4.77 million)). Total interest accrued on the promissory note in the current year amounted to ₹351.12 million (\$0.96 million) (2019: ₹394.22 million (\$1.09 million)) while a gain as a result of changes in the cashflows amounting to ₹57.66 million (\$0.18 million) (2019: nil) was recorded during the year.

(b) The movement in loans during the year was as follows:

_	2020	2019
	₩'000	N '000
Balance at 1 January	247,292,548	251,379,342
Proceeds from loan drawn down during the year	-	15,157,762
Transaction costs on loans and borrowings	-	(1,557,440)
Accrued interest	36,149,043	35,531,453
Interest paid	(12,129,471)	(28,844,610)
Principal repaid	(15,375,371)	(21,590,293)
Fair value gain on PAIF loan recognised directly in profit or loss (Note 7(b))	-	(521,158)
Net foreign exchange difference	(1,108,664)	86,469
Effect of Change on Shareholder loans due to revised Cashflows	(8,113,273)	(1,588,937)
Translation difference	20,977,514	(760,040)
Balance at 31 December	267,692,326	247,292,548

As at year end, total interest accrued in the current year amounted to №36.15 billion (\$91.55 million) (2019: №35.53 billion (\$98.16 million)).

Loans and borrowings are analysed into current and non-current liabilities based on the timing of repayment obligations as follows:

	2020	2019
	₩'000	№ '000
Non-current liabilities	231,863,211	201,034,336
nt liabilities	35,829,115	46,258,212
	267,692,326	247,292,548

APWAL measures its compliance to financial covenants under the Common Terms Agreement (CTA) dated 27 November 2014 (as amended and restated on 9 December 2015). The financial covenants are set out in CTA Section 5.03(a)(iv) Negative Covenants, CTA Section 5.01(v) the Affirmative Covenants, and Project Completion Date definition requirement for Senior Debt to Equity Ratio. The major financial covenants cover historic and prospective debt service coverage ratios and debt to equity ratios. Measurements of compliance were performed at Calculation Dates of 15 May 2020 and 15 Nov 2020. The financial covenant ratios were met by the Company.

(c) Change in estimate

During the year, the directors re-estimated the amount of the cashflows on the shareholder loan based on revised available cash forecasts. A gain amounting to \text{\text{\text{8}}}8.11 billion (\$20.72 million) arising from the re-estimation of cashflows has been included as part of interest expense during the year.

Information about the Company's exposure to interest rate, foreign currency and liquidity risks is included in Note 26.

22 Deferred income

The Company obtained a Naira denominated long term loan amounting to \$\frac{1}{20.99}\$ billion (\$104.95 million) from the Bank of Industry (BOI) through a commercial bank in Nigeria and facilitated by the CBN PAIF concessional window. The loan is to be repaid over a period of 10 years. Interest will be payable on outstanding loan balances at the rate of 7% per annum. The loan is secured on the Azura-Edo independent power plant and was obtained exclusively to finance the Azura-Edo independent power plant project. The drawdowns on the loan were initially recognised at fair value, being the present value of the expected future cash flows discounted at the obtainable market-related interest rates on the drawdown dates ranging between 22% and 25%. The grant is amortized over the economic useful life of the plant at same rate at which the plant is depreciated.

	16,658 19,068 (16,658) (1)

25 Interest rate swaps

(a) Interest rate swaps

The Company held an interest rate swap derivative asset instrument for risk management purposes. The Company entered into interest rate swap contracts with three counterparties, International Finance Corporation (IFC), Standard Chartered Bank (SCB) and Rand Merchant Bank (RMB) with an initial notional amount of \$259.88 million with effect from 29 December 2015, whereby the Company pays a fixed rate of interest of 2.509% and receives a variable rate equal to 3 months/6 months USD-LIBOR-BBA. The derivative instrument was designated as a hedging instrument in qualifying hedging relationships. Based on the procedures performed, the reasonable fair values of the financial instruments have been established as a liability of ₹5.11 billion (\$12.94 million) (2019: Liability of ₹2.26 billion (\$6.21 million)) and the hedge has been determined to be effective as at 31 December 2020, hence, the effective portion of changes in the fair value of the derivative of ₹2.66 billion (\$6.73 million) (2019: ₹2.85 billion (\$7.88 million)) was recognised in other comprehensive income and accumulated in the hedging reserve.

(b) Cash flow hedges of US Dollar loans

The Company uses interest rate swaps to hedge the interest rate risks in respect of the benchmark interest rate (mainly LIBOR) from its floating-rate loans denominated in the US Dollar.

The Company's approach to managing market risk, including interest rate risk, is discussed in Note 26(c). The Company determines the amount of the exposure to which it applies hedge accounting by assessing the potential impact of changes in interest rates on the future cash flows from its floating-rate loans. This assessment is performed using analytical techniques, such as cash flow sensitivity analysis.

By using derivative financial instruments to hedge exposures to changes in interest rates, the Company exposes itself to credit risk of the derivative counterparties, which is not offset by the hedged items. The Company minimises counterparty credit risk in derivative instruments by entering into transactions with high-quality counterparties with good credit ratings and a history of strong financial performance.

The Company assesses whether the derivative designated in each hedging relationship is expected to be and has been highly effective in offsetting changes in cash flows of the hedged item (prospectively and retrospectively) using the Dollar Offset Method (Sensitivity Analysis Approach). The Dollar offset method involves comparing the ratio of the change in the fair value or present value of future expected cash flows of the hedging instrument with the change in the fair value or present value of future expected cash flows of the hedged item attributable to the hedged risk.

Under the Company's policy, in order to conclude that a hedge relationship is effective, all of the following criteria should be met.

Prospective effectiveness test

For the hedge relationship to be considered highly effective, the dollar offset ratio should be within the range of negative 80% to 125% (the negative indicating the offset). Being a prospective hedge effectiveness test, simulation analysis will be used to demonstrate that the dollar offset ratio is expected to be effective under a series of reasonably likely/possible changes in the hedged risk. When the cumulative dollar offset ratio is within negative 80% and 125% under all scenarios, the relationship is considered to be highly effective on a prospective basis. Based on the procedures performed, the reasonable fair values of the financial instruments have been established (Note 26(f)) and the hedge has been determined to be effective as at 31 December 2020.

Retrospective Effectiveness Test

The Company will perform a retrospective effectiveness test on an ongoing basis for the purpose of determination of the continuance of cash flow hedge accounting designation and application or potential de-designation due to test failure. The test will be performed using the dollar offset method detailed above in the Prospective Effectiveness Test. Based on the procedures performed, the retrospective assessment of the hedge for the year was deemed to be effective.

The movement in interest rate swaps during the year is as follows:

2020	2019
N '000	N '000
(2,260,999)	608,836
(2,657,218)	(2,868,553)
(192,558)	(1,282)
(5,110,775)	(2,260,999)
	№'000 (2,260,999) (2,657,218) (192,558)

Information relating to the amount and timing of future cash flows of the hedging instrument has been disclosed in Note 26(d) of these financial statements.

26 Financial risk management and financial instruments

Overview

The Company has exposure to the following risks from its use of financial instruments:

- Credit risk
- · Liquidity risk
- Market risk

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital. Further quantitative disclosures are included throughout these financial statements.

Risk management framework

The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's risk management policies are established to identify and analyse risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

As part of the Company's corporate governance activities, the Company has a Board Audit and Risk Committee (BARC). BARC is mainly responsible for the integrity of the Company's financial statements and budgets, and for monitoring the effectiveness and objectivity of the external auditors, as well as to ensure compliance with laws and regulations, and to ensure that risks affecting the Company are effectively managed. The Company's board audit and risk committee also oversees how management monitors compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company.

(a) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from related parties and financial institutions.

The carrying amounts of financial assets and contract assets represent the maximum credit exposure.

Note	2020	2019

17	46,286,917	33,597,206
13(b)	2,434,195	2,134,251
13	24,148	28,773
	105,483,936	82,333,604
	13 13 13(a) 17 13(b)	N'000 13 36,983,931 13 10,646,150 13(a) 9,108,595 17 46,286,917 13(b) 2,434,195 13 24,148

The Company's exposure to credit risk is influenced mainly by the individual characteristics of the Company's single customer. However, management also considers the factors that may influence the credit risk of its customer, including the default risk associated with the industry in which customer operates. The Board of Directors have established a credit policy under which the Company's customer is analysed for creditworthiness on an ongoing basis. The Company's review includes external ratings, if they are available, financial statements, credit agency information and industry information.

The Company limits its exposure to credit risk from trade receivables by establishing a maximum payment period of 15 business days to its sole customer.

The Company's exposure to credit risk is influenced mainly by the ability of Nigerian Bulk Electricity Trading Plc (NBET) to enforce payments from the distribution companies. The Company has trade receivable for which no loss allowance is recognised because of collateral.

Payments by NBET to the Company under the PPA are secured by a letter of credit amounting to \$120 million issued in favour of the Company by an international bank. In addition, the Company entered into a Partial Risk Guarantee contract (PRG) with International Bank for Reconstruction and Development (IBRD) under which IBRD provides additional guarantee on the letter of credit issued by the international bank in favour of the Company. On the basis of this, the directors believe that credit risk has been reduced to the barest minimum as the year end receivables from NBET are less than the letter of credit amount.

Expected credit loss (ECL) assessment for the Company's customer

The Company uses an allowance matrix to measure the ECLs of trade receivables from its customer, which comprise a very small number of large balances.

Loss rates are calculated using a 'roll rate' method based on the probability of a receivable progressing through successive stages of delinquency to write-off. Roll rates are calculated for exposures based on the common credit risk characteristics of the receivables.

The following table provides information about the exposure to credit risk and ECLs for trade receivables as at 31 December 2020.

31 December 2020	Gross carrying	Credit Impaired
	amount	
	<u>₩</u> '000	
Current (not past due)	29,452,577	No
31–60 days past due	7,058,195	No
61–90 days past due	11,119,310	No
	47,630,082	
31 December 2019	Gross carrying	Credit Impaired
	amount	
	<u>₩'000</u>	
Current (not past due)	30,896,155	No
31–60 days past due	9,164,086	No
61–90 days past due	234,039	No
	40,294,280	

Loss rates are based on actual credit loss experience during the year. These rates are multiplied by scalar factors to reflect differences between economic conditions during the period over which the historical data has been collected, current conditions and the Company's view of economic conditions over the expected lives of the receivables.

The scalar factor is based on the credit rating of Nigeria which is B credit rating.

The Directors have applied judgment in the Company's assessment of the recoverability of its trade and other receivables. The significant judgment involved estimation of future cash flows and the timing of those cash flows. Based on the assessment of the Directors, these trade and other receivables were fully recoverable and accordingly no impairment has been recorded.

To provide an indication about the reliability of the inputs used in determining expected credit loss, the Company has classified trade receivables into stage 2.

Accrued receivables

Accrued receivables represents receivables from sales of power, reimbursables and start up payments which are yet to be invoiced to NBET as at year end. The directors believe that the unbilled receivables are still collectible in full as the directors have evaluated NBET's ability to pay. No impairment was recorded with respect to this amount in the current year as they are considered fully recoverable and thus have minimal credit risk (2019: Nil).

Other receivables

Other receivables represent cash deposits used to collateralise irrevocable standby letters of credit (L/C) issued in favour of Seplat Petroleum Development Company Plc (Seplat) and Nigerian Gas Company (NGC). These letters of credit are held by banks and financial institutions in Nigeria. In the directors' view, all amounts are collectible. No impairment was recorded with respect to this amount in the current year as they are considered fully recoverable and thus have minimal credit risk (2019: Nil).

No impairment allowance was recorded on the Company's other receivables during the year.

Cash and cash equivalents

The Company held cash and cash equivalents of ₹46.29 billion (\$117.19 million) (excluding cash in hand) as at year end (2019: ₹33.60 billion (\$92.30 million)) which represents its maximum credit exposure on these assets. The cash and cash equivalents (with the exception of ₹1.97 million (\$4,981) held as cash by the Company) are held by banks and financial institutions. The Company mitigates the credit risk exposure of its bank balances by selecting reputable banks with good credit ratings and a history of strong financial performance.

Impairment on cash and cash equivalents has been measured on a 12-month expected loss basis and reflects the short maturities of the exposures. The Company considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties.

No impairment allowance was recorded on the Company's other receivables during the year.

	2020	2019

	46,288,884	33,599,540

Interest rate swaps

The Company held an interest rate swap derivative asset instrument for risk management purposes. The Company entered into interest rate swap contracts with three counterparties, International Finance Corporation (IFC), Standard Chartered Bank (SCB) and Rand Merchant Bank (RMB) with an initial notional amount of \$259.88 million with effect from 29 December 2015, whereby the Company pays a fixed rate of interest of 2.509% and receives a variable rate equal to 6 months USD-LIBOR-BBA. The derivative instrument was designated as an hedging instrument in qualifying hedging relationships.

(b) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulties in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company has a clear focus on ensuring sufficient access to capital to finance growth. As a part of the liquidity management process, the Company has various credit arrangement with various financial institutions and its shareholders which can be utilised to meet its cash settlement requirements (See Note 21 to these financial statements).

The following are the remaining contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements:

					Contractual c	ash flows

^{*}Excluding statute based deductions.

The interest payments on variable interest rate loans in the table above reflect market forward interest rates at the reporting date and these amounts may change as market interest rates change.

(c) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

The Company manages market risks by keeping costs low through various cost optimization programs. Moreover, market developments are monitored and discussed regularly, and mitigating actions are taken where necessary.

The Company uses derivatives to manage market risks. All such transactions are carried out within the guidelines set by the Board Audit and Risk Committee (BARC) and the Board of Directors. Generally, the Company seeks to apply hedge accounting to manage volatility in profit or loss.

Except for the USD LIBOR floating rate debt, other variable interest rates were not referenced to interbank offered rates (IBORs) that will be affected by the IBOR reforms.

Included in the variable rate borrowings are floating rate debt whose interest rate is based on 6 month USD LIBOR. To hedge the variability of the cash flows of this loans, the Company entered into interest rate swap agreements with key terms (principal amount, payment dates, repricing dates, currency) which matches those of the debt on which it pays a fixed rate and receives a variable rate.

Currency risk

The Company is exposed to currency risk on borrowings and certain contingent settlement obligations that are denominated in a currency other than the functional currency of the Company, which is the US Dollars (USD). The currency in which these transactions primarily are denominated is the Nigerian Naira and Euro. The currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to the changes in foreign exchange rates.

In managing currency risk, the Company aims to reduce the impact of short-term fluctuations on earnings.

Although the Company has various measures to mitigate exposure to foreign exchange rate movement, over the longer term, permanent changes in exchange rates would have an impact on profit. The Company monitors the movement in the currency rates on an ongoing basis.

Exposure to currency risk

The Company's transactional exposure to the Nigerian Naira and Euros was based on notional amounts as follows:

_	2020)	201	.9
	EUR'000	N'000	EUR'000	N'000
Financial assets				
Cash and cash equivalents	-	25,974,602	-	16,599,994
Trade receivables	-	6,254,150	-	7,877,512
Other financial liabilities				
Loans and borrowings	-	(12,048,197)	-	(13,273,191)
Trade and other payables	(721)	(3,495,891)	(2,586)	(1,819,720)
Net exposure	(721)	16,684,664	(2,586)	9,384,595

Sensitivity analysis

A strengthening of the USD, as indicated below against the Naira at 31 December would have affected profit or loss and equity by the amounts shown below. This analysis is based on foreign currency exchange rate variances that the Company considered to be reasonably possible at the end of the reporting period and has no impact on equity. The analysis assumes that all other variables, in particular interest rates, remain constant.

The analysis is performed on the same basis for 2019, albeit that the reasonably possible foreign exchange rate variances were different, as indicated below:

	Increase in profit of	Increase in profit or loss and equity		
	2020	2019		
	\$'000	\$'000		
NGN (20 percent strengthening)	(8,448)	(5,156)		
EUR (20 percent strengthening)	177	581		

A strengthening of the Naira against the Dollar at 31 December would have had the equal but opposite effect on the above dollar to the amounts shown above, on the basis that all other variables remain constant.

The following significant exchange rates were applied during the year:

	Average r	ate	Reporting date s	pot rate
	2020	2019	2020	2019
	\$	\$	\$	\$
NGN	0.0026	0.0028	0.0025	0.0027
EUR	0.8684	1.0791	0.8141	0.8898

Hedge accounting

Interest rate risk

The Company adopts a policy of ensuring that over 75% of its interest rate risk exposure is at a fixed rate. This is achieved partly by entering into fixed-rate instruments and partly by borrowing at a floating rate and using interest rate swaps as hedges of the variability in cash flows attributable to interest rate risk.

The Company determines the existence of an economic relationship between the hedging instrument and hedged item based on the reference interest rates, tenors, repricing dates and maturities and the notional or par amounts.

The Company assesses whether the derivative designated in each hedging relationship is expected to be effective in offsetting changes in cash flows of the hedged item using the Dollar Offset Method (Sensitivity Analysis Approach).

In these hedge relationships, the main sources of ineffectiveness are:

- the effect of the counterparty and the Company's own credit risk on the fair value of the swaps, which is not reflected in the change in the fair value of the hedged cash flows attributable to the change in interest rates; and
- differences in repricing dates between the swaps and the borrowings.
- the effects of the forthcoming reforms to USD LIBOR, because these might take effect at a different time and have a different impact on the hedged item (the floating-rate debt) and the hedging instrument (the interest rate swap used to hedge the debt).

Exposure to interest rate risk

The interest rate profile of the Company's interest-bearing financial instruments of the Company is as follows:

	Carrying	Carrying amount		
	2020	2019		
	N '000	№ '000		
Fixed rate instruments				
Financial liabilities	(107,833,583)	(88,905,999)		
	(107,833,583)	(88,905,999)		
		amount		
	2020	2019		
	№ '000	₩'000		
Variable-rate instruments				
Financial liabilities	(159,858,743)	(158,386,549)		
Effect of interest rate swaps	(5,110,775)	(2,260,999)		
	(164,969,518)	(160,647,548)		

Interest is charged at 2% plus 3-Months LIBOR per annum on the USD due receivables and 2% plus 3-Months NIBOR per annum on the Naira due receivables. The Company's receivables are not past due as at year end, as such the Company does not have an interest rate risk exposure in respect of its receivables as at year end.

Fair value sensitivity analysis for fixed rate instruments.

The Company does not account for any fixed rate financial assets and liabilities at fair value through profit or loss, and the Company does not designate derivatives (interest rate swaps) as hedging instruments under a fair value hedge accounting model. Therefore a change in interest rates at the reporting date would not affect profit or loss.

Cash flow sensitivity analysis for variable-rate instruments

A reasonably possible change of 100 basis points in interest rates at the reporting date would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant.

	Profit or Loss		
	100 bp	100 bp	
	increase	decrease	
	\$'000	\$'000	
For the year ended 31 December 2020			
Variable-rate instruments	(1,598,587)	1,598,587	
Interest rate swaps	(51,108)	51,108	
Cash flow sensitivity	(1,649,695)	1,649,695	
For the year ended 31 December 2019			
Variable-rate instruments	(1,583,865)	1,583,865	
Interest rate swaps	(22,610)	22,610	
Cash flow sensitivity	(1,606,475)	1,606,475	

In managing interest rate risk, the Company aims to reduce the impact of short-term fluctuations in earnings. Dividend pay-out practices seek a balance between giving good returns to shareholders on one hand and maintaining a solid debt/equity ratio on the other hand.

(d) Derivative assets designated as cash flow hedges

The following table indicates the periods in which the cash flows associated with cash flow hedges are expected to occur and the carrying amounts of the related hedging instruments.

	Expected cash flows					
	Carrying		12 months	More than		
	amount	Total	or less	one year		
	№ '000	N '000	№ '000	₩'000		
For the year ended 31 December	2020					
Interest rate swaps						
Liabilities	(5,110,775)	(5,431,118)	(1,979,515)	(3,451,603)		
	(5,110,775)	(5,431,118)	(1,979,515)	(3,451,603)		
		Expected ca	ash flows			
	Carrying		12 months	More than		
	amount	Total	or less	one year		
	№ '000	N '000	№ '000	₩'000		
For the year ended 31 December Interest rate swaps	2019					
Liabilities	(2,260,999)	(2,355,310)	(530,797)	(1,824,513)		
	(2,260,999)	(2,355,310)	(530,797)	(1,824,513)		

(e) Capital risk management

The Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Company monitors capital using a ratio of 'adjusted net debt' to 'adjusted equity'. For this purpose, adjusted net debt is defined as total liabilities, comprising interest-bearing loans and borrowings, less cash and cash equivalents. Adjusted equity comprises all components of equity other than amounts accumulated in the hedging reserve.

The Company's debt to adjusted capital ratio at the end of the reporting period was as follows:

	2020	2019
	₩'000	№ '000
Loans and borrowings	267,692,326	247,292,548
Lease liabilities	98,290	-
Less: Cash and cash equivalents	(46,288,884)	(33,599,540)
Net debt	221,501,732	213,693,008
Total equity	8,619,037	(3,587,510)
Net debt to equity ratio	2570%	-5957%

There were no changes in the Company's approach to capital management during the year. The Company is subject to externally imposed capital requirements for loan facilities obtained from it's external lenders.

(f) Fair values

(i) Accounting classification and fair value

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

	Carrying Value	Fair Value
	₩'000	№ '000
For the year ended 31 December 2020		
Financial assets not measured at fair value

	(2,260,999)	(2,260,999)
Financial liabilities not measured at fair value		
Trade and other payables (Note 24)	(16,925,926)	(16,925,926)
Loans and borrowings (Note 21)	(247,292,548)	(247,292,548)
	(264,218,474)	(264,218,474)

Financial instruments measured at fair value – Fair value hierarchy

This section explains the judgments and estimates made in determining the fair values of the financial instruments that are recognised and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified interest rate swap into Level 2. An explanation of level 2 follows underneath the table.

	Note	Level 1	Level 2	Level 3	Total
		№ '000	№ '000	№ '000	№ '000
For the year ended 31 December 20	020				
Derivatives used for hedging					
Interest rate swap	25	-	(5,110,775)	-	(5,110,775)
Loans and borrowings	21	-	(267,692,326)	-	(267,692,326)
		-	(272,803,101)		(272,803,101)

	Note	Level 1	Level 2	Level 3	Total
		₩ '000	№ '000	№ '000	№ '000
For the year ended 31 December	2019				
Derivatives used for hedging					
Interest rate swap	25	-	(2,260,999)	-	(2,260,999)
Loans and borrowings	21	-	(247,292,548)	-	(247,292,548)
		-	(249,553,547)	-	(249,553,547)

Recognised fair value measurements

There were no transfers among levels 1,2 and 3 for recurring fair value measurements during the year.

Level 2 includes the fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Valuation techniques used to determine fair values

The fair value of interest rate swaps and loans and borrowings were calculated as the present value of the estimated future cashflows based on observable interest rate points along the yield curve.

27 Related party relationships and transactions

Parent and ultimate controlling party

The parent company of Azura Power West Africa Limited is Azura-Edo Limited incorporated in Mauritius. Azura-Edo Limited owns 97.5% of the issued share capital of Azura Power West Africa Limited, while 2.5% is held by Edo State Government. The ultimate parent Company, is Actis Energy Bedrock Mauritius Limited.

The Company had the following transactions with the under-listed related parties during the year:

(a) Azura-Edo Limited (AEL)

AEL is a subsidiary of Azura Power Holding Limited (APHL) and the immediate parent of the Company. On 1 December 2014, the Company entered into a seven year shareholder loan agreement with Azura-Edo Limited (which extinguished the Development Cost Loan Agreement (DCLA) entered in 2013, as amended, with a facility amount of \$118.71 million).

On 20 December 2015, the seven (7) year term loan of \$118.71 million was extinguished and replaced by a loan facility of \$129.73 million with a term not less than 8 years.

During 2019, the company transferred ₹2.01 billion (\$5.1 million) to Azura-Edo limited (AEL) representing loan payable to the mezzanine lenders. This amount would serve as a mitigating factor in future if shortage of liquidity arises in Nigeria. The amount has been recognised as amount receivable from AEL and still outstanding at year end.

During the year, the company incurred accrued interest on the shareholder loans amouting to ₹12.93 billion (\$33.97 million). The balance due to AEL in the form of loans and borrowings amounted to ₹93.59 billion (\$236.95 million) at year end (2019: ₹73.88 billion (\$202.98 million)).

(b) Azura Power Holdings Limited (APHL)

APHL is a global business company organised and existing under the laws of Mauritius. It is an indirect parent of the Company. As part of the management structure of the Azura-Edo IPP Project, APHL provides integrated services to the Company under the Integration Services Agreement (ISA). The ISA amended and restated the Management Services Agreement which was executed between the parties prior to financial close.

During the year, the Company incurred certain costs amounting to ₹113.39 million (\$0.30 million) on behalf of APHL Balance due from APHL as at year end amounted to ₹407.07 million (\$1.03 million) (2019: ₹277.85 million (\$0.76 million)).

Transactions with key management personnel

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly, including any director of the Company. There were no transactions with key management personnel during the year.

	2020	2017
	N '000	№ '000
Short-term employee benefits	205,319	271,362
Post-employment benefits	12,617	7,765
	217,936	279,127

2019

2020

28 Capital commitments

The Company has no capital expenditure commitments relating to its independent power plant project as at 31 December 2020 (2019:

29 Contingencies

Pending litigation and claims

- (a) On 20 February 2018, APWAL was joined as a defendant, with NBET and four other defendants, in a case brought against them by Mainstream Energy Solutions Limited and three other electric generating companies. The plaintiffs sought to restrain the Federal Government of Nigeria ("FGN"), the Central Bank of Nigeria ("CBN"), Minister of Power, Works and Housing (the "Minister"), Nigerian Bulk Electricity Trading PLC ("NBET"), from applying or utilizing funds from the Payment Assurance Facilities (the "PAF") towards settling APWAL's (and Accugas Limited's) invoices to NBET in a preferential manner.
 - The proceedings relating to the case have been the subject of a number of adjournments, with the case finally dismissed on 28 September 2020 following the Plaintiffs' notice of discontinuance.
- (b) On 10 May 2019, APWAL was served with originating processes (bearing Suit No. HAB/22/2019) with HRH Vincent Nosa Ohenzuwa as claimant. By an 11-paragraph statement of claim, the claimant is essentially praying the Edo State High Court for orders that APWAL pays a total sum of N84,285,300, being alleged underpayment of the top-up compensation that was made to the claimant with respect to certain plots of land included in Plot A of APWAL's Project Site. The top-up compensation was made by APWAL ex-gratia, following Edo State Government's revocation of title to the said plots in order to facilitate the Project.

The proceedings relating to the case have been the subject of a number of adjournments, with the case finally dismissed on 4 February 2021 following the Plaintiffs' notice of discontinuance.

30 Put Call Option Agreement (PCOA)

A Put Call Option Agreement (PCOA) was executed on 22 October 2014 by APWAL, Azura-Edo Limited, the Federal Government of Nigeria ("FGN"), and Nigerian Bulk Electricity Trading Plc ("NBET"). Upon an early termination of the PPA, the PCOA sets out the terms and conditions under which the FGN and/or NBET will have a right or an obligation (or both) to purchase the shares or the assets of the Company from its owners (Azura-Edo Limited) at an agreed mechanism for purchase price valuation dependent on reasons of early termination.

31 Going Concern

In accordance with the Common Terms Agreement (CTA) between the Company, its major shareholder (Azura-Edo Limited) and external lenders; the Shareholder has undertaken to subordinate the amount due to them in favor of the other creditors and will not call back the shareholder loans until such a time that the Company is in a position to make repayment in the normal course of business, without prejudice to the rights of other creditors.

Current foreign currency shortages in the Nigerian market expose the Company to inconvertibility risks for the next twelve months which might limit the Company's ability to make timely payments for contractual obligations in foreign currency as they arise, thus adversely affecting financial conditions of the Company despite holding sufficient Naira cash balances. Without sufficient foreign currency, the Company would not be able to replenish fully the senior debt service reserve account within the required 30-day period following the May 2021 debt service transactions and would potentially not be able to make senior interest and principal repayments in full to its lenders for the 15 November 2021 payment date. Unpaid mezzanine loan amounts due on 15 November 2021 would be automatically deferred in accordance withthe CTA. Any outstanding mezzanine deferred loans not repaid in full by the date falling 30-months after when first made would result in an Event of Default as defined by the CTA. An Event of Default would also occur under the Company's financing agreements when total combined principal amount outstanding of deferred and non-deferred Mezzanine Loans exceed \$108.3 million; which is expected could occur in November 2022 or thereafter should foreign currency shortages continue in Nigeria to a similar degree as currently experienced.

Failure to comply with these CTA loan obligations could result in an Event of Default (EoD) under the financing agreements. If the Company is unable to make interest or principal payments when due, Lenders will have the right to charge Default Interest of 2%. If an EoD was to continue without being cured or waived, the Company's lenders could accelerate repayment obligations in full or in part by issuing a notice to that effect. Notwithstanding the CTA terms, it is the Directors reasonable expectation that, during the period of the next twelve months from the reporting date, the Company's Lenders will not elect to issue a notice to accelerate the debt repayment. The project continues to be operationally sound and performing within expectations, with the exception of the foreign currency shortages which are beyond the Company's control and are being experienced widely across the Nigerian economy.

The Company's potential inability to pay foreign currency debt obligations despite holding sufficient Naira cash balances is as a result of country-level macroeconomic conditions due to the unavailability of foreign exchange currency and not project-specific issues. Constant mitigation measures to secure foreign currency, and to make the upcoming 2021 interest payment dates, are being taken by the Company through continued engagement with all relevant third parties including the Company's Lenders and the Central Bank of Nigeria. Although ongoing difficulties are anticipated to secure foreign currency in a timely manner to meet foreign currency obligations, the Directors believe the Company has a reasonable probability of success in accessing some foreign currency within the twelve-month period as demonstrated by foreign currency receipts in the current year. As of date, Lenders' full support and engagement has been exhibited in our ongoing efforts to secure the required foreign currency to meet the November 2021 CTA requirements.

These financial statements have been prepared on the basis of accounting policies applicable to a going concern and no adjustments have been adopted to reflect any possible future effects of the uncertainty related to the foreign currency inconvertibility risks or classification of recorded asset amounts or the classifications or amounts of liabilities.

32 Events after the reporting date

(a) Unavailability of foreign exchange

The Company receives payments primarily in naira from NBET with certain true up options to help mitigate the effects of currency fluctuations between the date of invoicing and the date of invoice settlement. Financial obligations to lenders, service providers, contractors, and shareholders require the Company to convert naira to foreign currency in order to settle these obligations. The Company relies on foreign currency purchased from Central Bank of Nigeria's (CBN) authorized foreign exchange windows. Current foreign currency shortages expose us to inconvertibility risks which may limit the Company's ability to make timely payments for contractual obligations in foreign currency as they arise; potentially impacting financial conditions. We anticipate continued difficulties in securing foreign currency; however, we do expect to have some access to foreign currency within the twelve-month period. APWAL received \$0.18 million of foreign currency subsequent to the reporting period end through March 2021

The Company has, with the pre-consent of the lenders, entered into foreign currency hedging non-deliverable forwards that will cushion the impact of volatility risks in foreign exchange prices.

(b) Renewal of Gas Utilization Tax Incentive

The Company was granted the benefits of the Gas Utilization Incentive (GUI) under Section 39 of the Companies Income Tax Act (CITA). The legislation grants a tax holiday to qualifying companies who use natural gas in their operations. The Company's tax exemption is effective May 2018 for three (3) years expiring in May 2021, following the certification of commercial production date by the Federal Ministry of Petroleum. The legislation permits the Company to be granted an extension of the tax holiday incentive for another two years, subject to satisfactory performance.

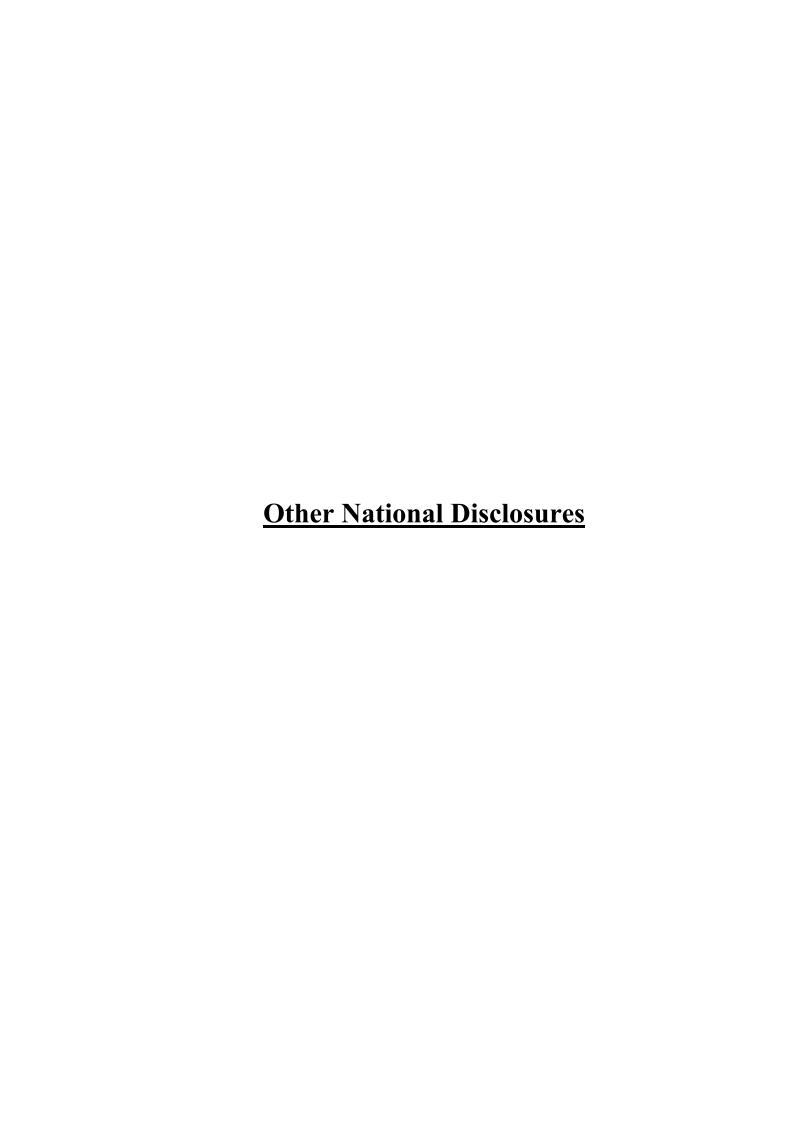

The Company has filed its GUI renewal application to the Federal Inland Revenue Service (FIRS) and is awaiting communication of extension approval. APWAL has fulfilled all the necessary criteria for renewal and as such there is no apparent reason at the time of application filing to believe that the tax holiday extension will not be granted. However, the approval or otherwise of the two-year extension is not considered to have any material impact on the financial statements for the period ending 31 December 2020.

33 Coronavirus outbreak

The COVID-19 outbreak which developed rapidly during 2020 continues post the end of the reporting period. Measures taken by the Nigerian government to contain the virus have affected economic activity.

As part of the country's essential commercial service providers, Power Plants would continue to be exempted from the lockdown and APWAL continues to operate with all mitigation measures in place. Azura-Edo IPP has invoked a COVID-19 plant emergency response action plan and policies, and procedures have been implemented to ensure the health and safety of its personnel, mitigate infection risks and ensure plant operational continuity. At this stage, the impact on our business and results is limited.

Azura-Edo IPP benefits from a PPA structure that enables repayment of debt and fixed costs by providing a fixed and predictable revenue stream, with a letter of credit in place for liquidity assurance. Our off-taker Nigeria Bulk Electricity Trading Plc (NBET), fully owned by the Nigerian government, may delay payment or may not be able to fulfil their obligations to us in a timely fashion as a result of business deterioration, cash flow shortages or difficulty obtaining financing due to macroeconomic conditions impacting commodity oil pricing, power sector problems, geopolitical disruptions, changes in law or other challenges affecting the strength of the Nigerian economy. Heightened dialogue is ongoing with all stakeholders; off taker, fuel and transport suppliers, operations and maintenance contractor, spare parts suppliers, Banks, Lenders and relevant Ministries to closely evaluate the evolution of the situation. Government has voiced commitment to support the energy sector during this crisis as an essential service.
